PROFESSIONAL PROFILE

Data professional with a Bachelor of Science in Statistics and 4+ years of experience in data entry, analysis, and digital content administration. Proficient in Excel, Power BI, SPSS, Python, and SQL, with a proven track record of accuracy, data integrity, and structured reporting. Strong communicator who thrives in remote environments and delivers high-quality, data-driven outcomes across diverse roles.

CORE SKILLS

Data Analysis • Data Entry • Data Cleaning & Validation • Statistical Analysis • Market Analysis • Microsoft Excel • Power BI • SPSS • Python • SQL • Data Visualization • Recordkeeping • Social Media Management • Attention to Detail • Remote Work

PROFESSIONAL EXPERIENCE

Data Analyst | Bluepen | Jun 2023 – Present

- Worked on student projects and assignments involving data analysis, applying analytical skills to real-world datasets.
- Cleaned, organized, and structured datasets using Python and Excel to prepare data for analysis and reporting.
- Used SQL to query and extract relevant data from databases in support of analytical tasks.
- Built basic reports and visualizations using Power BI and Excel to present findings clearly.
- Applied statistical methods learned from BSc Statistics to interpret data and draw meaningful conclusions.
- Documented analytical processes and findings with attention to detail, ensuring clarity and reproducibility.

Social Media Manager & Market Analyst | Circlelook Digital Marketing | Mar 2021 – Sep 2022

- Managed social media platforms for clients, overseeing content planning, scheduling, and audience engagement.
- Conducted market analysis to identify trends, audience behavior, and competitor activity to guide content strategy.
- Maintained organized records of content calendars and social media analytics for easy reference and reporting.
- Analyzed social media performance data and prepared simple reports to support client decision-making.
- Coordinated with the team to ensure consistent and accurate content across all platforms.

Work Study — Computer Lab Assistant | Jomo Kenyatta University of Agriculture and Technology | Jan 2022 – Dec 2023

- Assisted statistics students in the computer lab, providing guidance on data analysis tools and software including SPSS, Excel, and Python.
- Supported students with assignments and projects involving data entry, analysis, and statistical computations.
- Maintained and cleaned computer lab equipment, ensuring a tidy and conducive learning environment for students.
- Helped students troubleshoot software issues and understand statistical concepts through practical demonstrations.

TECHNICAL PROJECTS

Python

- Developed data cleaning and transformation scripts using pandas to reformat and standardize raw datasets, significantly reducing manual data preparation time.
- Built automation scripts to process large datasets and generate consistent, structured summary reports, improving output reliability and efficiency.
- Conducted exploratory data analysis combining Python statistical functions and visualization libraries to uncover trends and patterns across datasets.

SQL

- Wrote queries using SELECT, JOIN, GROUP BY, and aggregate functions to extract and summarize data from relational databases for analysis and reporting.
- Combined SQL data extraction with Python analysis to build end-to-end exploratory data analysis workflows across multiple datasets.
- Used SQL to support structured data formatting and database querying tasks in freelance data projects.

Power BI

- Designed and built interactive dashboards and visualizations to present data insights clearly to both technical and non-technical stakeholders.
- Connected Power BI to Excel data sources to create dynamic reports tracking key performance metrics across projects.
- Used Power BI's data transformation features (Power Query) to clean and reshape data before building visual reports.

SPSS

- Performed descriptive and inferential statistical analysis using SPSS, including frequency distributions, cross-tabulations, and hypothesis testing.
- Applied SPSS for data exploration and statistical reporting during academic and personal data analysis projects.
- Used SPSS to analyze and interpret datasets, drawing meaningful conclusions and presenting findings in structured formats.

Microsoft Excel

- Built pivot tables, lookup formulas, and conditional formatting to organize and summarize large datasets efficiently.
- Created structured data dashboards and charts to track and communicate key metrics across projects.
- Used Excel for data validation, cleaning, and structuring tasks across both professional roles and personal projects.

LANGUAGES

- English — Fluent, professional written and verbal communication
- Swahili — Fluent, conversational and written

EDUCATION

Bachelor of Science in Statistics

Jomo Kenyatta University of Agriculture and Technology | 2020 – Present

Kenya Certificate of Secondary Education — Grade B+

Kilimo High School, Kenya | 2018 – 2019
